

BTC WAR

THE WAR FOR BITCOIN HAS ALREADY BEGUN.

Protect the Future. Defeat Quantum. Save Bitcoin.

\$BTCWAR · Solana

Whitepaper – 2026

■ BLOCK 000001 ■ HASH: fdfb1ed6da2a3a8ccc9f8a0ac801ed7f

01 – THE BEGINNING

Bitcoin was created to survive.

But what if someone knew it would eventually need more than code?

What if, hidden inside its earliest days, there was something else?

A guardian.

A machine built to stand between Bitcoin and whatever came next.

That is where the story of **BTC WAR** begins.

■ BLOCK 000002 ■ HASH: 92604ca95b90969f627a456e91a1f14a

02 – THE REASON

BTC WAR was created for people.

The game is the door.

The story is the world.

The mystery is what pulls you deeper.

The technology is what makes it possible.

But the community is the reason we build.

BTC WAR is about creating connections between people – a place where people can meet, play, create, laugh, compete and feel that they belong.

Life can be difficult.

Some people carry anxiety, loneliness, depression, or battles nobody else can see.

BTC WAR cannot replace professional help, and it doesn't pretend to.

But a community can still matter.

Sometimes having somewhere to go matters.

Sometimes having someone to talk to matters.

Sometimes simply knowing that other people are there matters.

We want BTC WAR to become:

THE MOST EXCITING PLACE TO ENTER.

THE MOST PEACEFUL PLACE TO STAY.

The world of BTC WAR can be dark, dangerous and unpredictable.

Quantum is coming.

The Fragments are spreading.

El Niño can tear through the battlefield.

SERA can fall.

But the community should be different.

Here, people don't have to fight alone.

SERA falls.

Aura brings her back.

FALL. RECHARGE. RISE.

That isn't only part of the story.

It is part of what BTC WAR represents.

■ BLOCK 000003 ■ HASH: 4813484eb2b2b01f1df49346e716f173

03 – WHAT IS BTC WAR?

BTC WAR is a community-driven fictional universe inspired by Bitcoin and cryptocurrency culture – combining story, mystery, an arcade game, community participation and the \$BTCWAR ecosystem.

It combines:

- An original science-fiction story
- A playable browser arcade game
- The \$BTCWAR community token
- A growing mythology of characters, enemies and events
- Future digital collectibles and story-driven experiences

At the center of everything is **SERA** – a machine seraph created to protect Bitcoin until the last coin is mined.

Her enemy is **Quantum**.

Her source of resurrection is **Aura**.

And somewhere in the darkness, someone may still be watching.

People may discover BTC WAR through the game, through SERA, through the mystery, or through the token. The reason we want them to stay is different: connection, belonging, friendship, curiosity, hope, and shared experiences.

BTC WAR is designed to grow as a **universe**, not simply as a token. The order matters: **game, then story, then mystery, then community, then token** – not the other way around.

■ BLOCK 000004 ■ HASH: ccb523cf06e04114a103036182308eeb

04 – THE REAL HISTORY

Bitcoin's history is extraordinary enough on its own.

In 1998, Wei Dai proposed **b-money**, an early concept for anonymous digital cash.

On October 31, 2008, a person or group using the name **Satoshi Nakamoto** published the Bitcoin whitepaper.

On January 3, 2009, the **Bitcoin Genesis Block** was mined.

Embedded inside that block was a headline from *The Times*:

"Chancellor on brink of second bailout for banks."

Bitcoin was born into a world questioning the traditional financial system.

Around 2010, Satoshi's public presence faded.

His identity has never been conclusively established.

And that mystery remains.

BTC WAR begins where documented history ends.

■ BLOCK 000005 ■ HASH: 34e1c46de5ae23a3cbef27c4f4799499

05 — WHAT IF?

What if Satoshi knew Bitcoin would eventually face a threat that could not be solved by another software update?

What if he prepared for it?

What if, alongside Bitcoin's code, he created something else?

Not another blockchain.

Not another currency.

A guardian.

SERA.

■ BLOCK 000006 ■ HASH: ac56a2f7c76ecb4c85ad1de1ea020f07

06 — THE STORY

2009 — THE GUARDIAN

Satoshi wasn't only writing code.

He was building a guardian.

He called her **SERA** — a machine seraph with one purpose:

Protect Bitcoin until the last coin is mined.

But Satoshi knew even a guardian this powerful would eventually burn out.

So he hid something inside her from the very first line.

A spark designed to bring her back after every battle.

He called it **Aura**.

Then Satoshi vanished.

Or did he?

2026 – EL NIÑO

The first real test arrived.

A storm swept through the world's markets – sudden, and it hit hard.

Bitcoin was not spared.

Its codename was:

El Niño.

The storm that should not have been survivable.

Bitcoin survived.

Satoshi's vision held.

But something had changed.

The guardian had been activated.

2042 – QUANTUM

Thirty-three years after SERA was created, the threat returned.

This time it wasn't hiding.

Its designation:

QUANTUM.

A machine built to break cryptography itself.
One by one, the other blockchains fell.
Bitcoin was the last one standing.
Not because it was invincible.
Because **SERA was still standing in front of it.**
Quantum's objective is simple:
BREAK BITCOIN.
REWRITE HISTORY.

AURA – THE PRICE OF SURVIVAL

Every time SERA falls, Aura brings her back.
She restores what the battle drained.
She reignites what nearly went out.
She gives SERA another chance.
But resurrection has a cost.
Every cycle takes something from SERA.
A memory.
A name.
A fragment of her past.
Something that never returns.
Fight.
Fall.
Recharge.
Rise.
Fight again.

Years of battle have left SERA powerful – but increasingly unable to remember her own history.

This cycle is more than a mechanic. **Fall. Recharge. Rise.** Inside the story, it's the price SERA pays to survive thirty-three years of war. Outside it, it's something every person carries too – the setbacks, the hard stretches, the moments that take more out of you than you expected to give. BTC WAR doesn't pretend a game or a token can fix that. But it can be a place that understands it.

THE MYSTERY

There is something neither SERA nor Aura understands.

Whenever SERA is about to break for good, something reinforces her.

Something in the darkness.

It isn't Aura.

Aura is only the fuel.

It isn't SERA.

She is unconscious when it happens.

Someone else is watching.

Someone who has never truly left.

Is it Satoshi?

The story doesn't answer.

Maybe it never will.

Not until the last coin is mined.

Not until the guardian's war finally ends.

SERA, Aura, Quantum, and the Reliquary are elements of the BTC WAR fictional universe. The disappearance of the real Satoshi Nakamoto remains unresolved, and BTC WAR does not claim to know his identity, location, actions, or fate.

■ BLOCK 000007 ■ HASH: 0470e05fc3212b76c358cede6068f8bb

07 – THE CHARACTERS

SERA

The Guardian.

Created in 2009 with one directive:

Protect Bitcoin until the last coin is mined.

SERA is the central character of BTC WAR.

A machine seraph designed to fight an enemy that should not exist.

Every battle makes her stronger.

Every resurrection takes something away.

AURA

The Spark.

Hidden inside SERA from the beginning.

Aura restores SERA after every battle and gives her the strength to continue.

But Aura cannot restore everything SERA loses.

She can bring the guardian back.

She cannot bring back every memory.

QUANTUM

The Threat.

A machine designed to break cryptography itself.

Quantum has already destroyed every blockchain in its path.

Only Bitcoin remains.

And SERA stands between Quantum and its final objective.

Break Bitcoin.

Rewrite history.

■ BLOCK 000008 ■ HASH: cbc5eed9fc3885c5dd49f4e514845e0

08 — THE GAME

TRIALS OF THE VOID

The BTC WAR universe isn't only something to read.

It is something to play.

Trials of the Void is a free, browser-based arcade game set in the year 2042.

Players take control of SERA and enter the battlefield against Quantum's forces.

The game is built around fast, accessible arcade gameplay with increasing difficulty.

PURIFY

Destroy corrupted enemies and collect Stardust.

GRACE

Build a stacking defensive shield from **×1 to ×6**.

A hit shatters your Grace before costing a life.

NOVA

Trigger SERA's shockwave ability to clear nearby threats.

SURVIVE

Trials become progressively more difficult.

The objective is simple:

Stay alive.

And eventually face the **Quantum Hydra**.

■ BLOCK 000009 ■ HASH: cd06dd26cd5ce1c7adc196ec279b29dd

09 – THE BATTLEFIELD

The game is designed to connect gameplay with the BTC WAR narrative.

Every enemy represents another fragment of Quantum's assault.

Every trial represents another stage of SERA's resistance.

Every leaderboard represents another record of the war.

The player is not simply chasing a high score.

The player is helping SERA hold the line.

■ BLOCK 000010 ■ HASH: c42b0a8bdd02594003ea40143304aa81

10 – PLAYERS BECOME PART OF THE STORY

BTC WAR is built around a simple idea:

The community isn't watching the war.

The community is fighting it.

Players can participate through:

- Playing *Trials of the Void*
- Competing on leaderboards
- Community events
- Weekly competitions
- Game achievements

- Future collectibles
- Story-driven campaigns
- Fan-created content

The game provides the battlefield.

The community creates the culture.

■ BLOCK 000011 ■ HASH: c3e04a46aec500f9d8bcfe2540a6f616

11 – \$BTCWAR

THE TOKEN

\$BTCWAR is the native community token of the BTC WAR project on Solana.

Total Supply: 1,000,000,000 \$BTCWAR

\$BTCWAR launches through StonkFun / Raydium LaunchLab in **Reward Token** mode, with Bitcoin as the quote asset.

The token uses a 3% transfer reward mechanism: eligible BTCWAR holders receive rewards in Bitcoin through the StonkFun reward mechanism. See Section 12.

The token connects the BTC WAR community, campaigns, future experiences and ecosystem.

■ BLOCK 000012 ■ HASH: b1e7ef68e42e9a9b972199412c6a4db2

12 – TOKENOMICS

Item	Detail
Total Supply	1,000,000,000 BTCWAR (fixed)
Network	Solana

Launch	StonkFun / Raydium LaunchLab
Launch Mode	Reward Token
Quote Asset	Bitcoin (Wrapped BTC on Solana)
Holder Rewards	3%, paid in Bitcoin
Liquidity	Bonding Curve → Raydium Graduation
Initial Project Purchase	Approximately 14.3% of total supply

3% BITCOIN HOLDER REWARDS

BTC WAR uses a 3% holder reward mechanism. Eligible BTCWAR holders receive Bitcoin rewards based on token activity and the StonkFun reward distribution mechanism.

BTCWAR activity → 3% holder reward mechanism → Bitcoin rewards → BTCWAR holders.

Initial Project Purchase

Approximately 14.3% of total supply.

This is not a free team allocation. These tokens are intended to be purchased through StonkFun at launch and then separated into dedicated project wallets.

Category	BTCWAR	% of purchase	% of total supply
Mining	21,000,000	14.67%	2.1%
Community	40,000,000	27.94%	4%
Guardian Rewards	20,000,000	13.97%	2%
Marketing	31,095,000	21.72%	3.11%
Development	31,095,000	21.72%	3.11%
TOTAL		100%	approx. 14.3%

- **Mining** – Reserved for the planned BTC WAR mining system and future mining-related rewards.

- **Community** – Reserved for community growth, participation, campaigns, airdrops, and ecosystem initiatives.
 - **Guardian Rewards** – Reserved for Guardian challenges, competitions, events, achievements, and community reward campaigns.
 - **Marketing** – Reserved for listings, partnerships, promotion, creator campaigns, community expansion, and project growth.
 - **Development** – Reserved for continued development of the BTC WAR website, game, infrastructure, integrations, maintenance, and future features.
-

■ BLOCK 000013 ■ HASH: 98644a133fb9a0afd220c111ecca4906

13 – BTC WAR MINING

BTC WAR Mining is an interactive community mining experience integrated directly into the BTC WAR universe.

Members will be able to enter mining sessions and play as SERA inside the BTC WAR network.

During a mining run, unusual fragments, codes, blocks, or other mining objects may appear inside the gameplay environment.

The player must find and physically intercept – touch – the mining object with SERA.

Find it. Touch it. Mine it.

BTC WAR Mining: Coming Soon.

BTC WAR Mining is a planned game and community reward mechanic, intended to become an interactive reward system connected to the BTC WAR gaming ecosystem.

Core mechanics:

- Weekly mining blocks
- Limited mining positions

- Every mining session is designed to feel different from the last
- Successful mining must be verified by the BTC WAR system
- Additional special rewards may sometimes be discoverable during mining

Some mining sessions may contain additional special discoveries or rewards beyond the standard mining reward. Not every miner receives one, and no fixed value or financial profit is promised.

Exact block sizes, mining amounts, schedules, eligibility rules, and reward mechanics may evolve over time and are not permanently fixed by this document.

BTC WAR Mining may use the official BTC WAR community and Telegram infrastructure as part of the mining access and verification process.

BTC WAR Mining is not traditional Proof-of-Work Bitcoin mining. It is a game and community participation system inspired by mining and blockchain concepts – not real Bitcoin mining. Players do not mine native BTC.

■ BLOCK 000014 ■ HASH: a5a972cf339418490c316cbe064e6d28

14 – TRANSPARENCY

BTC WAR believes trust should come from verification, not promises.

The project prioritizes:

Public token supply.

Verifiable on-chain transactions.

Published contract information.

Clear disclosure of what exists and what does not.

No fictional partnerships.

No invented exchanges.

No fake utility.

No promises of guaranteed returns.

If something is planned, it will be described as planned.

If something exists, it will be shown.

If something changes, the documentation should change with it.

■ BLOCK 000015 ■ HASH: 029546f07e3a442a29ac9b0a8a6046de

15 – LIQUIDITY & SECURITY

BTC WAR launches through the StonkFun / Raydium LaunchLab bonding curve.

Always verify the official contract address before interacting with \$BTCWAR.

■ BLOCK 000016 ■ HASH: 432548b47ff0badc3a2d50fedd44f530

16 – THE RELIQUARY

The BTC WAR universe is designed to extend beyond the game.

The **Reliquary** is the planned home of BTC WAR digital collectibles.

It is divided into three concepts.

HISTORICAL SEALS

Digital collectibles inspired by real Bitcoin history.

These pieces connect the fictional BTC WAR universe to the real history that inspired it.

WAR RELICS

Artifacts from the fictional war.

SERA.

Aura.

Quantum.

Weapons.

Guardians.

Battle scenes.

Fragments of the story.

GAME MOMENTS

Digital collectibles connected to achievements and milestones inside *Trials of the Void*.

The exact mechanics, rarity structure, supply and minting details will be announced separately.

Nothing should be considered live until officially released.

■ BLOCK 000017 ■ HASH: b66e75b21567daed47e950954dabdae1

17 — THE UNIVERSE

BTC WAR is designed to expand beyond a single game.

Future experiences may introduce:

- New characters
- New enemies
- New chapters
- New battlefields
- New game modes
- New collectibles

- New community events
- New story revelations

The objective is not to build everything at once.

It is to build the universe **one piece at a time**.

■ BLOCK 000018 ■ HASH: c742b69cac3b6388e5d48e46d6f63c55

18 – COMMUNITY

Our community isn't simply a group of holders.

It is a group of people.

People who discovered the world of BTC WAR and decided to become part of it.

You don't need to own \$BTCWAR to belong.

You don't need to be the best player.

You don't need to understand everything immediately.

You simply need to participate.

Play.

Talk.

Create.

Help someone.

Make someone laugh.

Discover the mystery.

Bring someone else into the story.

The game provides the battlefield.

The community creates the culture.

And the culture is what makes BTC WAR alive.

BTC WAR should be exciting without becoming toxic.

Competitive without becoming hostile.

Mysterious without becoming manipulative.

Ambitious without forgetting kindness.

The fictional world is at war.

The community is where we find peace.

■ BLOCK 000019 ■ HASH: 8a9219ab607c72b364c01ce6726542a8

19 – THE BTC WAR CODE

PEOPLE BEFORE NUMBERS.

CONNECTION BEFORE SPECULATION.

RESPECT BEFORE EGO.

CURIOSITY BEFORE CERTAINTY.

NO FINANCIAL PRESSURE.

NO GUARANTEED PROMISES.

NO TOXICITY.

HELP WHEN YOU CAN.

WELCOME THE NEW ONES.

PROTECT THE COMMUNITY.

FALL. RECHARGE. RISE.

BTC WAR is a place where excitement and peace can exist together.

CHAOS IN THE STORY.

PEACE IN THE COMMUNITY.

■ BLOCK 000020 ■ HASH: e4acf8a6efeeec539ca88033e500cf9a7

20 – COMMUNITY REWARDS

BTC WAR currently uses community competitions and campaigns to reward participation.

One recurring example is the:

WEEKLY WAR PRIZE

1 SOL

awarded through the project's leaderboard competition according to the published eligibility rules.

Future competitions may introduce different formats.

Rewards are campaign incentives and should not be interpreted as guaranteed returns from holding \$BTCWAR.

■ BLOCK 000021 ■ HASH: 018557861da11f1f1903d06769fa706a

21 – ROADMAP

BTC WAR does not believe in pretending the future is already built.

The roadmap separates what exists from what is being developed.

PHASE I – AWAKENING

LIVE

- BTC WAR website
- BTC WAR story and lore
- SERA, Aura and Quantum universe
- *Trials of the Void* browser game
- Community channels

- X presence
 - Community campaigns
 - Weekly leaderboard competition
-

PHASE II – THE FIRST BATTLE

CURRENT

- \$BTCWAR launch through StonkFun / Raydium LaunchLab (Reward Token mode)
 - 3% holder rewards in Bitcoin
 - Raydium graduation when the StonkFun/LaunchLab funding threshold is reached
 - Whitepaper publication
 - Continued game development and improvements
 - Community growth and expansion
 - New BTC WAR content and campaigns
 - Increased game visibility
 - Expanded community competitions
 - CoinGecko / CoinMarketCap listing
 - Exploring additional exchange visibility as the project grows
-

PHASE III – THE RELIQUARY

PLANNED

- Historical Seals
 - War Relics
 - Game Moments
 - NFT infrastructure
 - Game achievement collectibles
 - Additional collectible mechanics
-

PHASE IV – THE NEXT CHAPTER

PLANNED

- New story chapters
- New characters
- New enemies
- Additional game experiences
- Token-gated experiences
- Expanded SERA and Aura interactions
- Community-driven events

Specific features, mechanics and release dates will be announced when sufficiently developed and ready to be presented.

The roadmap is a statement of direction, not a guarantee of delivery.

BTC WAR MINING – COMING SOON

A planned game and community reward mechanic.

Weekly blocks. Limited mining positions. Special discoveries.

Find it. Touch it. Mine it.

■ BLOCK 000022 ■ HASH: 9ff1e08722cf8bf795979f11da94d107

22 – WHAT BTC WAR WILL NOT DO

The crypto industry has enough projects making promises that never become reality.

BTC WAR takes a different approach.

We will not claim:

- Guaranteed profits
- Guaranteed exchange listings
- Guaranteed market capitalization
- Partnerships that do not exist

- Utility that has not been built
- Technology that has not been deployed

The story can be mysterious.

The documentation should not be.

■ BLOCK 000023 ■ HASH: 35eb01fbe8973c676da90760daea74da

23 – THE FOUNDER

BTC WAR is independently created and developed, with a focus on building the game's technology, narrative universe and community.

The project prioritizes shipping over promises.

The game is playable.

The story is public.

The token model is published.

The official contract address is
C8ket8HpGpJJXLSbaqyNgGAJgaPNYqK5WzgjRPuskf13.

Development and future releases will be communicated through the project's official channels.

As BTC WAR grows, additional contributors may join the project and be introduced through the official channels.

■ BLOCK 000024 ■ HASH: 903a5e46838a0e24bebd790a08d5430e

24 – RISKS

Cryptocurrency is highly speculative.

The value of \$BTCWAR may increase or decrease dramatically, including potentially becoming worthless.

Participants may lose some or all of the funds they use to acquire tokens.

Smart contracts, wallets, decentralized exchanges, liquidity infrastructure and third-party services can contain technical or operational risks.

The BTC WAR game and ecosystem may change over time.

Planned features may be delayed, changed or never released.

NFTs, if released, may have no resale value.

Community rewards may change or end.

Nothing in this whitepaper constitutes financial, investment, legal or tax advice.

Participants should conduct their own research and verify all contract addresses and transaction information independently.

■ BLOCK 000025 ■ HASH: 884d2ff6c521facc8c08c962d969af88

25 – FICTION & DISCLAIMER

BTC WAR is an entertainment and community project inspired by Bitcoin, cryptocurrency culture, and the enduring mystery surrounding Satoshi Nakamoto.

SERA, Aura, Quantum, El Niño, the Reliquary and the BTC WAR timeline are elements of the BTC WAR universe.

The identity, whereabouts and disappearance of Satoshi Nakamoto remain unresolved in real-world history.

BTC WAR does not claim to know the answer.

Some mysteries are better left open.

Bitcoin and BTC WAR are separate.

\$BTCWAR is not Bitcoin.

BTC WAR is not affiliated with the Bitcoin network, Satoshi Nakamoto, or any Bitcoin developer or organization unless explicitly stated.

Nothing in this document constitutes financial advice, a prediction of market performance, or a promise of any outcome.

Game points earned in *Trials of the Void* are not tokens, carry no monetary value, and do not create an entitlement to future rewards.

Cryptocurrency is highly volatile. You can lose everything you put into it.

BTC WAR offers community, friendship, belonging and hope. It does not replace professional mental-health care, and nothing in this document should be read as a medical or therapeutic claim.

Do your own research. Verify the contract address before you buy. Never spend more than you can afford to lose.

■ BLOCK 000026 ■ HASH: 4320e30646aede7afca4f3db83d158c7

26 — THE FINAL QUESTION

Satoshi disappeared.

Bitcoin survived.

SERA was created.

Aura keeps bringing her back.

Quantum is coming.

And somewhere in the darkness...

someone is still watching.

Maybe Satoshi knew.

Maybe he didn't.

Maybe the guardian was always meant to fight alone.

There is only one way to find out.

Keep fighting.

BTC WAR

PROTECT THE FUTURE.

DEFEAT QUANTUM.

SAVE BITCOIN.

THE WAR ISN'T OVER.
